

## 2014 CTF CIVIL ENGINEERING SCHOLARSHIP

**HUONG LE**

I want to thank Caltrans for giving me a chance to work as an engineering student assistant at HQ. I have been studying and gaining knowledge about transportation a lot here. It is an initial step for me to get used to the transportation field and also a good preparation for my future career. I am so grateful to have a scholarship from the California Transportation Foundation (CTF), which really inspires me to pursue a transportation career. It will also be a great privilege if I become a member of Caltrans team after graduating.
